

INSTRUCTIONS FOR PERFORMING SOCCER GOAL ANCHOR TEST

1. Verify goal has been assembled according to manufacturer's instructions.
2. Inspect goal for damage, broken parts, and loose hardware. Replace any broken parts and be sure all hardware is tightened properly before performing test.
3. Anchor goal in accordance with manufacturer's instructions. If using counterbalance weight, be sure the correct amount is being used.
4. Clear all persons from a minimum 50 foot radius surrounding the goal.
5. Verify goal is attached to anchors according to instruction.
6. Apply a horizontal pull force of 247 lbs. to the center of the crossbar for 60 - 70 seconds. Full safety precautions must be taken while performing test.
7. If goal overturns during application of force or does not return to an upright position after removing force, an alternate anchoring system must be used.

Anchor Weight Requirements

Notes:

- 1) Above listed weights are accurate only if goal is outfitted with all equipment supplied with goal and has been assembled in accordance with manufacturer's instructions.
- 2) Weight must be placed as close to rear corners of goal as possible and evenly distributed between the left and the right sides.
- 3) Weights listed above are sufficient for goal to pass anchored goal testing requirements of ASTM F2950.

** Goals are excused from the anchored goal testing requirements of ASTM F2950. Weights listed are Kwik Goal recommendations to stabilize goals for normal use.

Above information only to be used with the corresponding Kwik Goal goals and is not intended to be used with any other product.
